

4th Day: Bremerhaven

29 marzo, 2019 Sin categoría

The first thing we did today was visit the University of Bremen, where they had prepared a Presentation and a tour of the school talking about renewable energies, especially the wind and making dynamic demonstrations. Then we moved to the centre of Bremen by train where we had free time to eat and visit the area. Later we took the train back to Bremerhaven and arrived around 18:20h. We all had things to do, some of us got together to watch a movie and others had dinner planned. Overall today has been a great day but very tired!
